Take a peek at what some of our end users have to say!

Jin Kichi
Hampstead

"We're an authentic Japanese restaurant and we've been running for a very long time. We adopted the CES Software about 9 years ago now. We use it both on iPad and iPhone which is really helpful. We got counters here and tables which the software automatically splits up both. When placing customer orders, all we have to do is tap it in. The orders get sent off according to the items to all the different kitchens – hot food kitchen and the sushi kitchen and we don't have to do any of that manually as we just need to tap it in and send. The sushi orders go to the sushi kitchen and the remaining hot food to go to the hot food kitchen. We don't need to run around chasing around the orders helping us to save time and this is great as our main focus can now be on the customers. The bill on the system makes everything a lot

ALLDISCOUNT100*P/1 - This will discount all products by 100% using reason code

SELECTDISCOUNT100*O/3 - This Will discount all selected products to £1.00 using reason code 3

quicker and efficient which means no long waiting around for customers after their meal. We adopted the software 9 years ago and I don't think we would ever go back."

West Street Vineyard
Colchester

"We've been open for 3 years, we are open for breakfast, lunch and dinner and also open for private functions. We adopted the CES Software about 3 years ago and it's really simple and easy to use. Processes our order in seconds. We do everything on our till from taking deposits, gift vouchers to putting an order through directly to the kitchen and it's really simple to use, we love it and would be lost without it."
